

The core concept is to let the user know how much cleaner or uglier his surrounding is through the following

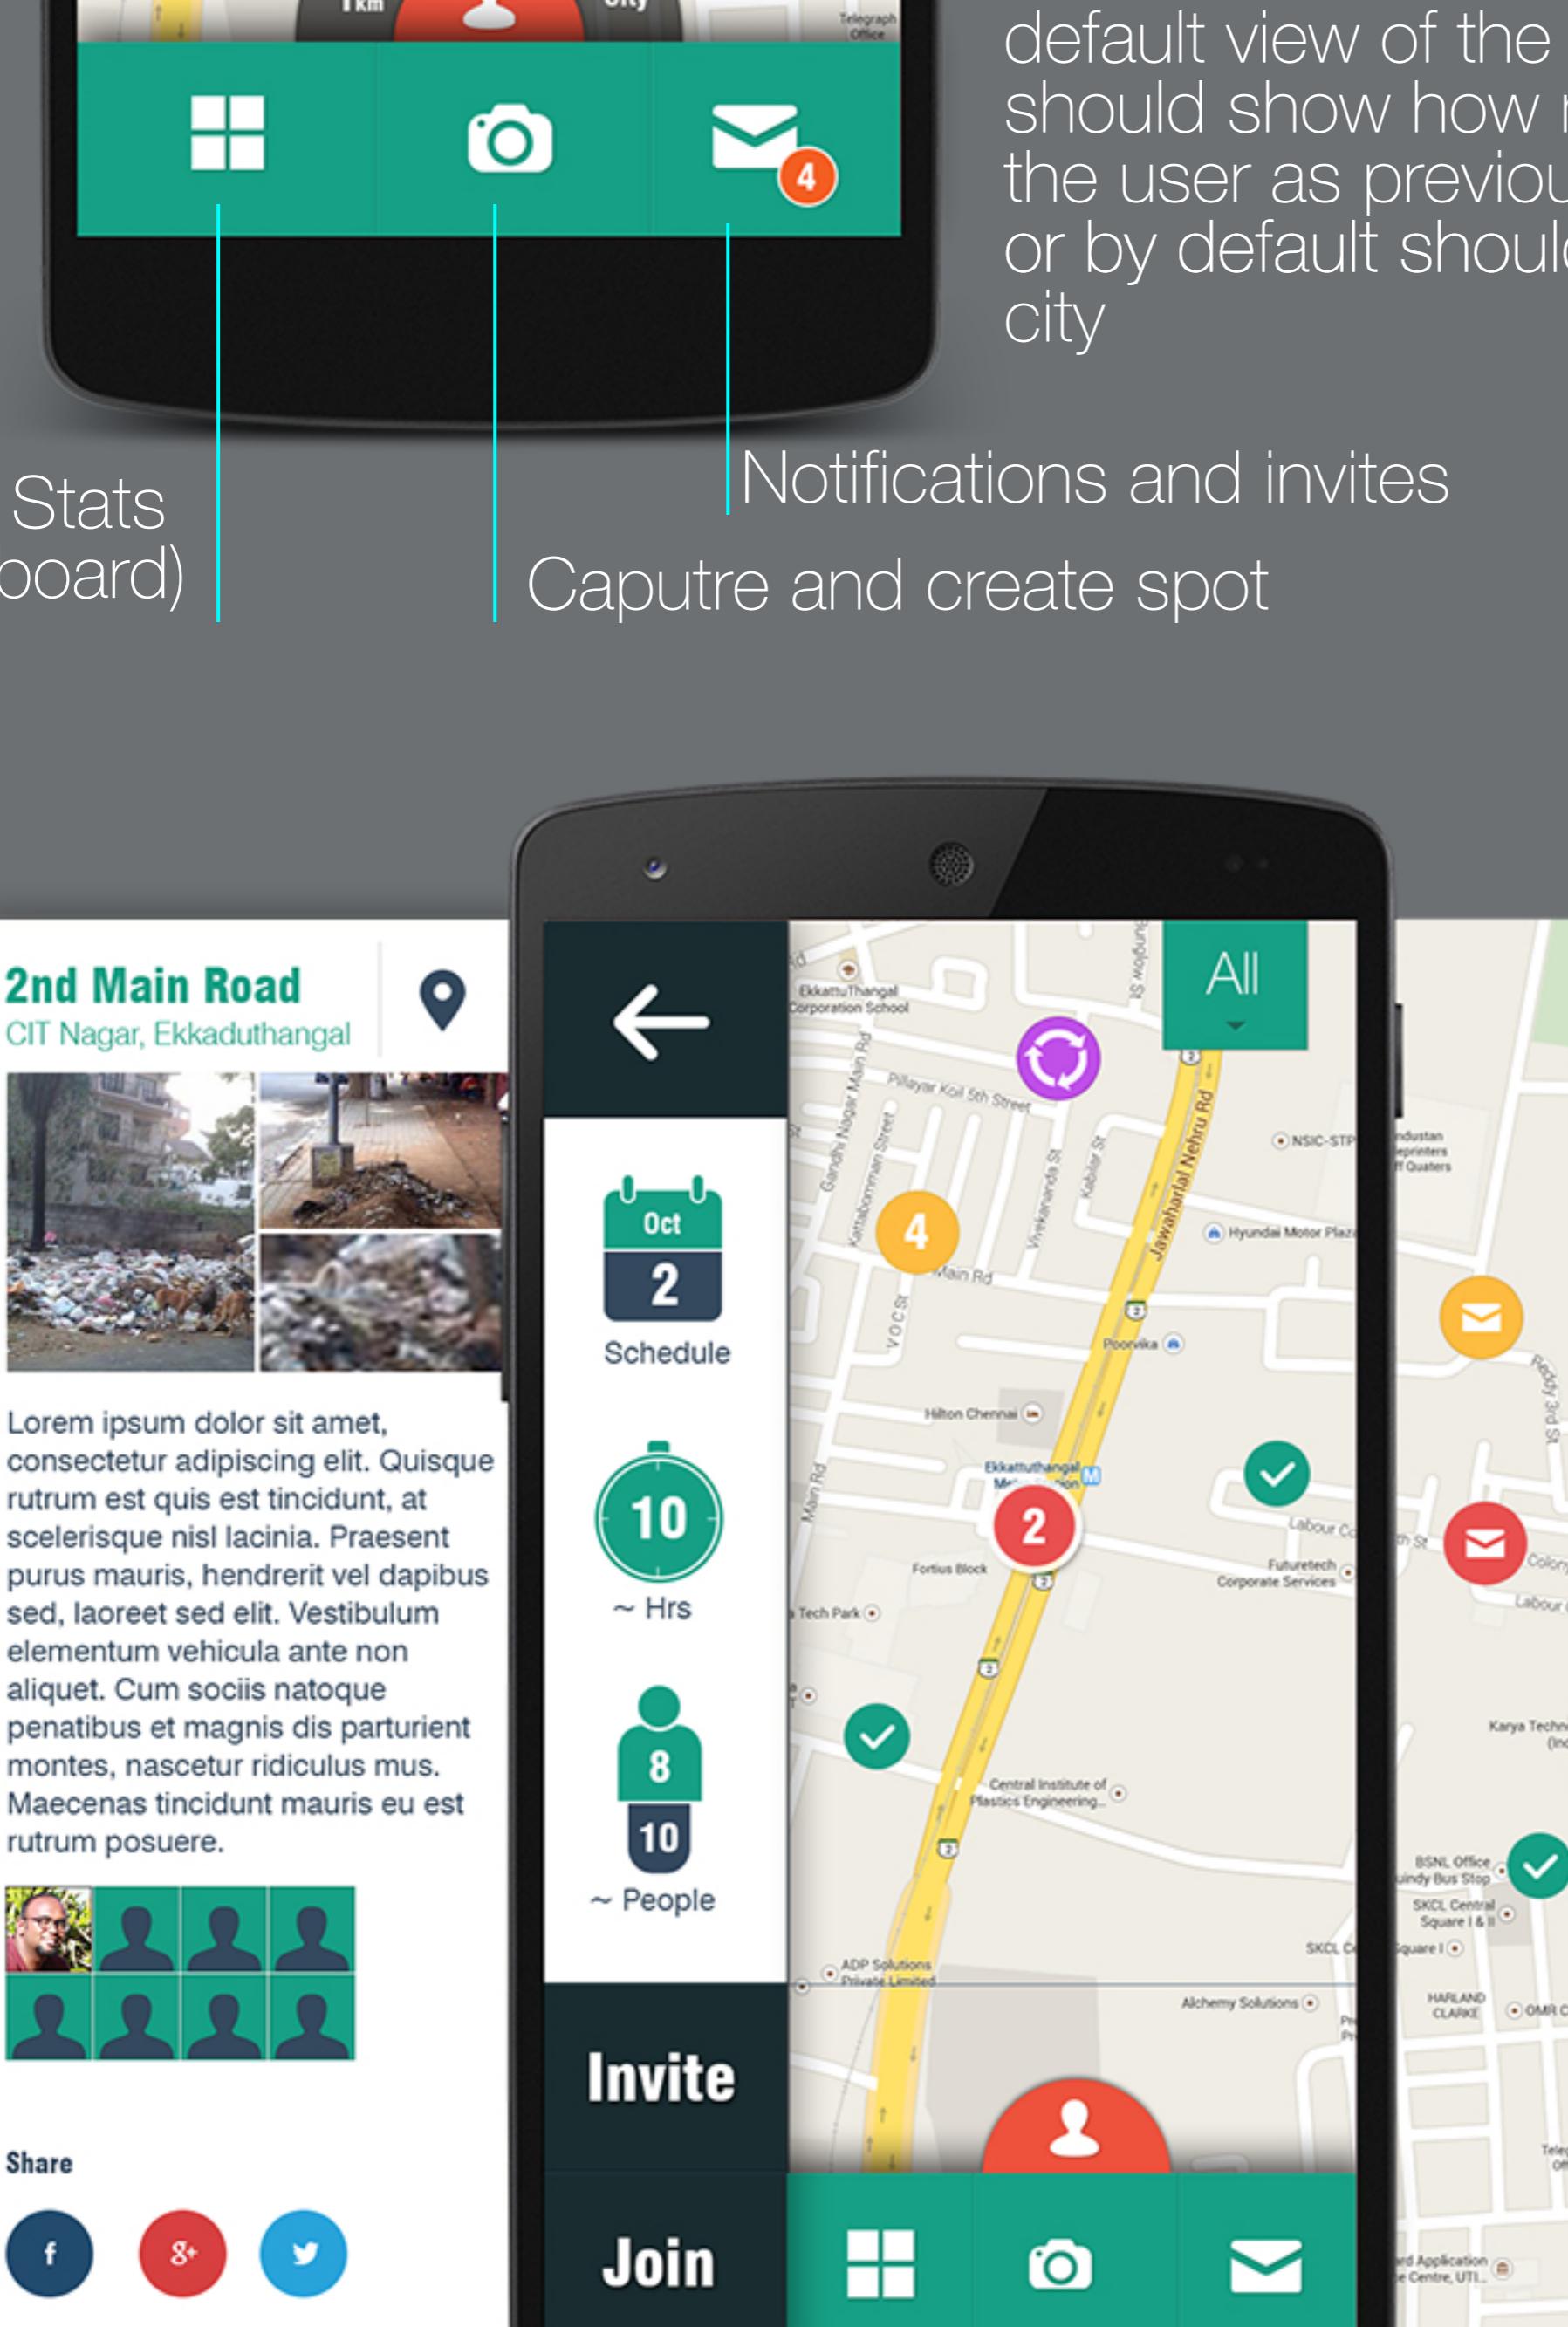

- Map on the starting screen with user location in the center.
- Using the touch dial user can set how much distance the map has to cover.
e.g., Radius of 1km, 5km, 10km, area, his city etc.,
- The map will display spots with the following icons

Yellow circle: Regular priority
Red circle: High priority

Splash Screen

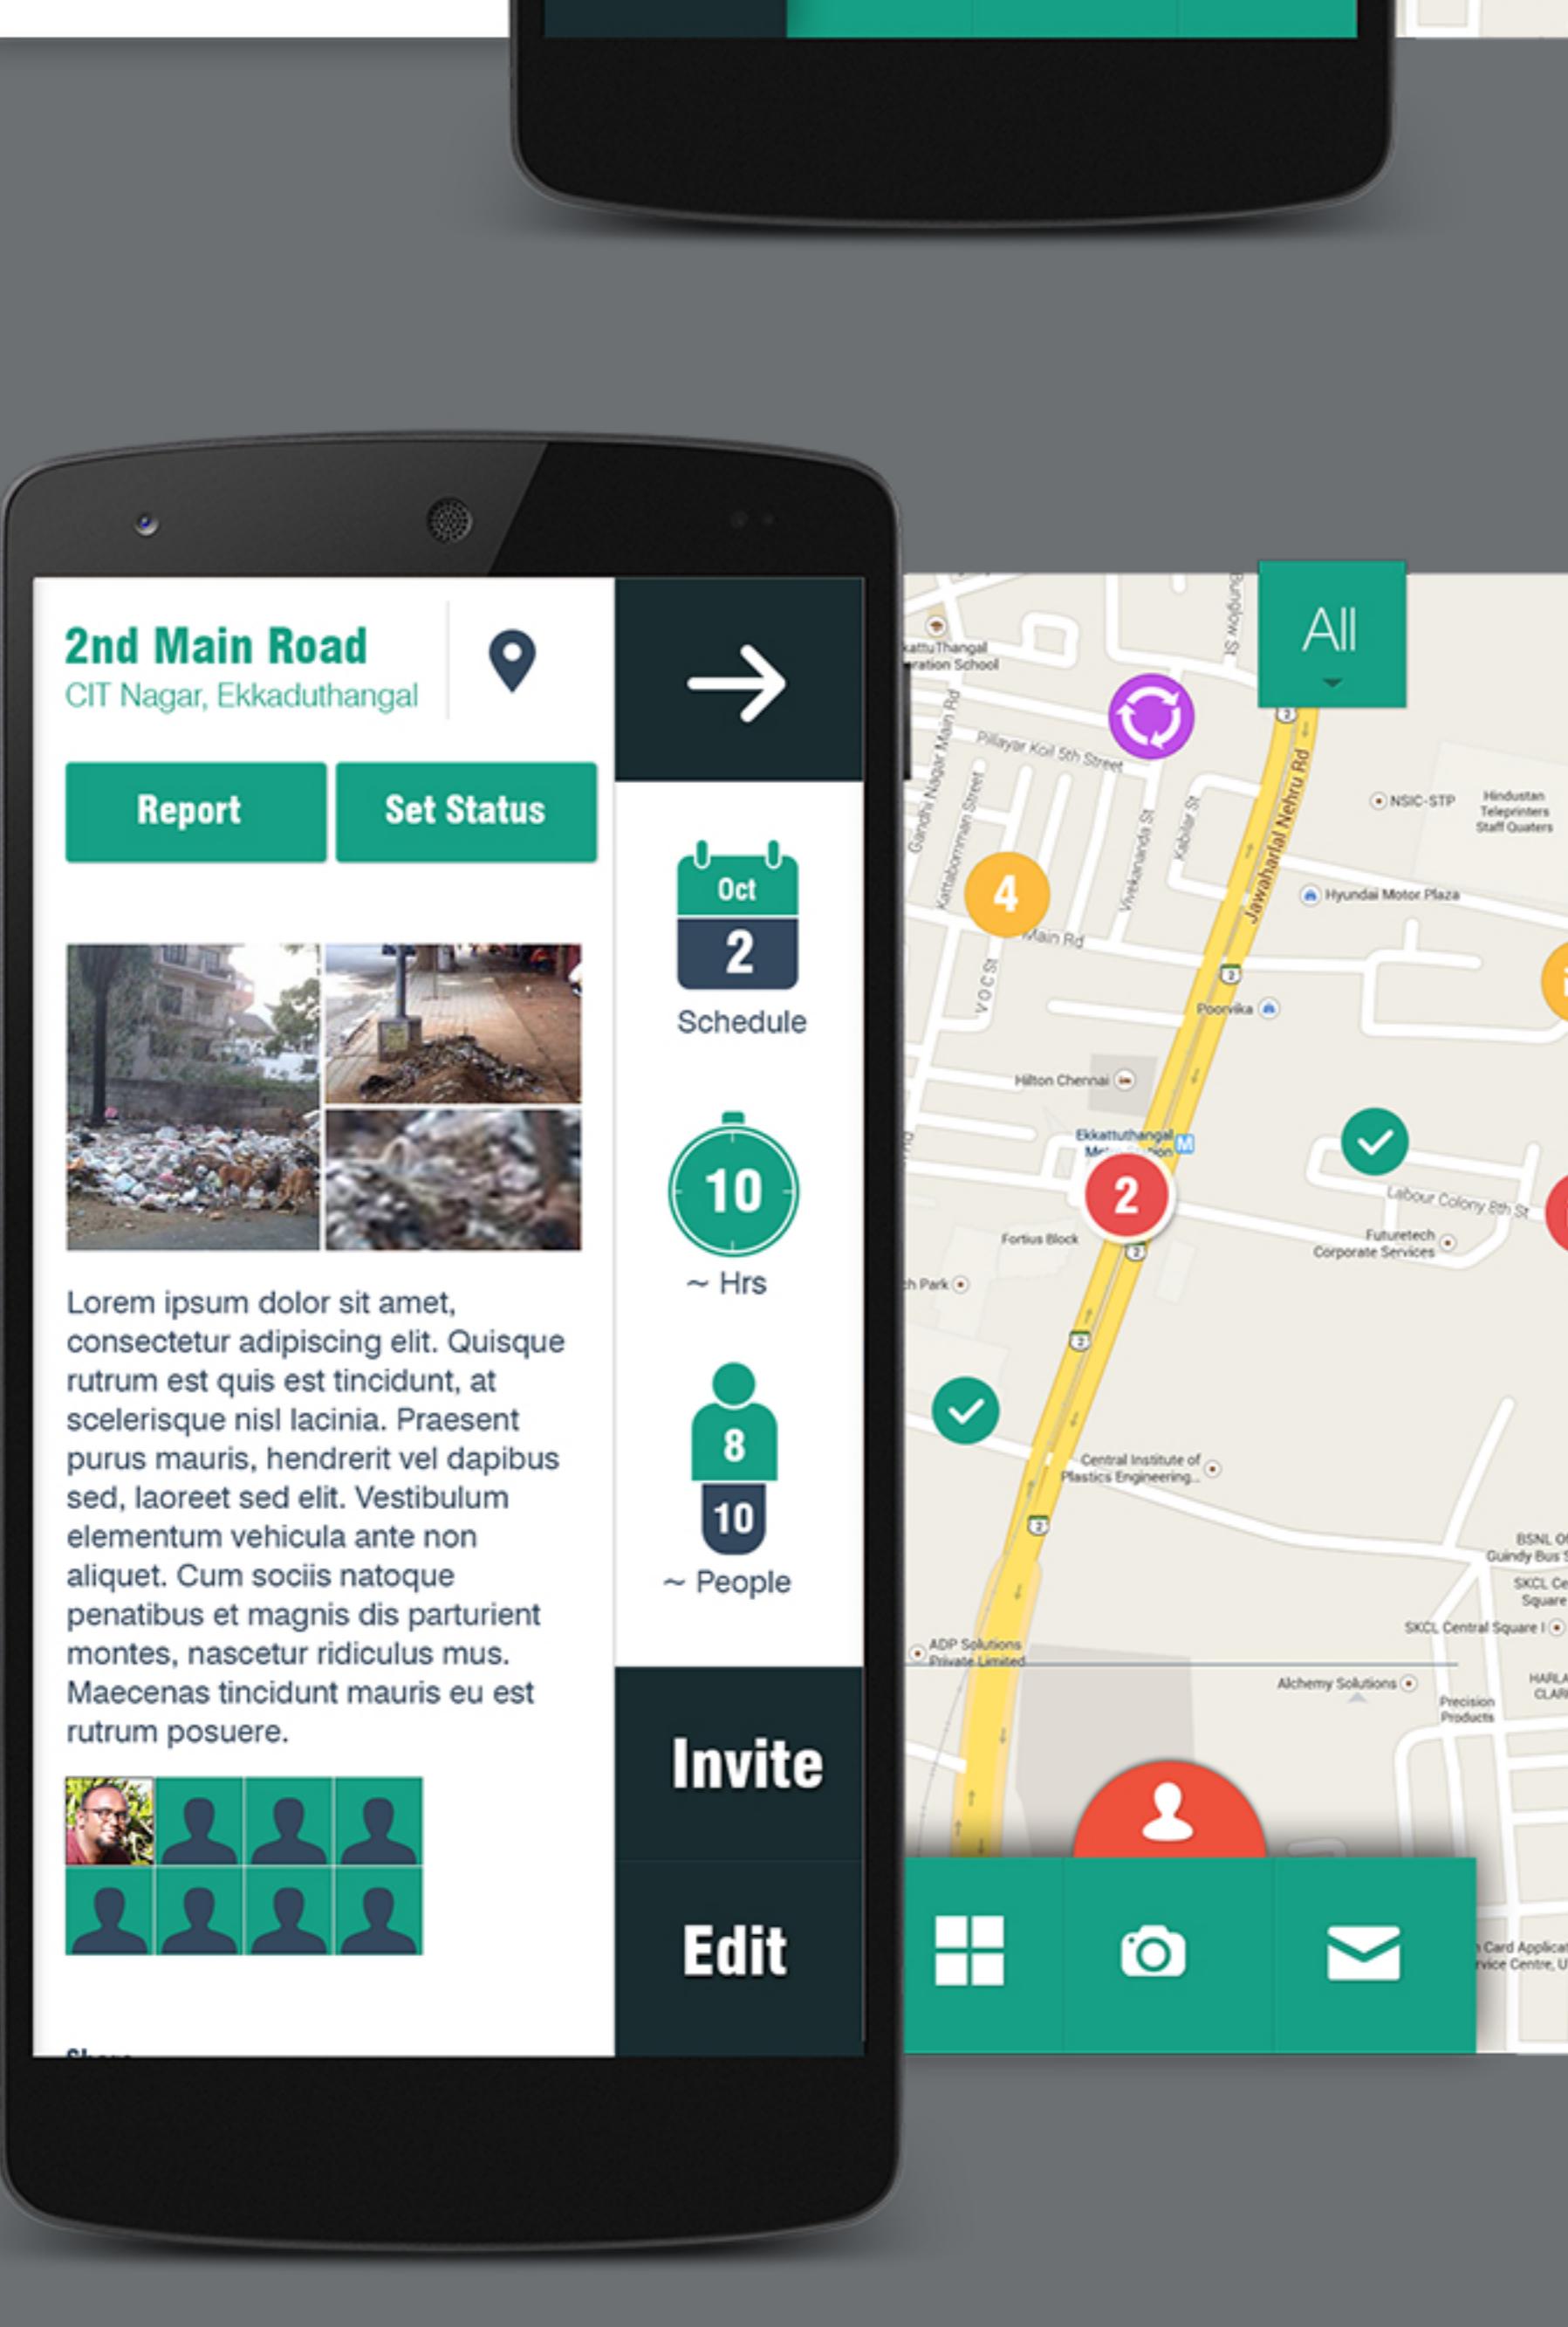

Sort option -
Slide down icons to show particular type of spots & Newly added spots, etc.,
